Science surrounds us. Even when we don't notice it, science touches almost every part of our lives. At the Story Collider, we believe that everyone has a story about science—a story about how science made a difference, affected them, or changed them on a personal and emotional level. We find those stories and share them in live shows and on our podcast. Sometimes, it's even funny.

Ben Lillie

Science Storyteller

Ben Lillie is a high-energy particle physicist who left the ivory tower for the wilds of New York's theater district. He now writes and performs stories about science and being a scientist, and is a Moth StorySLAM champion. He also writes for TED.com, and likes to say that life is different now, largely because it is.
